Updates to your Sewer Back-up coverage

Thank you for choosing Aviva for your insurance needs. It's our privilege to protect what's important to you.

We have updated the wording of this specific endorsement to make it clear that it only covers damage caused by water coming into your property from a sewer, septic tank or sump pump.

In addition, if you have a loss that we cover, we have added a special feature that provides up to \$1,000 towards the cost of a device to help protect you from future sewer back-up losses.

Please refer to the enclosed policy wording for the full details of your Sewer Back-up coverage.

We appreciate your business and look forward to continuing to serve you. If you have any questions about your insurance policy or need additional coverage, please contact your insurance broker.

Terms and conditions apply.
